API

● WHY TRIPGIC

Skip the queue. Launch in days.

Direct GDS integration takes 6–12 months. Multiple contracts. Three different data formats. Endless certification. We handle all of that — so you don't have to.

WITHOUT TRIPGIC

The Old Way

- ✗ 6–12 months per GDS for certification
- ✗ Separate contracts with each supplier
- ✗ Three different data formats to maintain
- ✗ Manual deduplication across sources
- ✗ Ongoing GDS update overhead

WITH TRIPGIC

The Tripgic Way

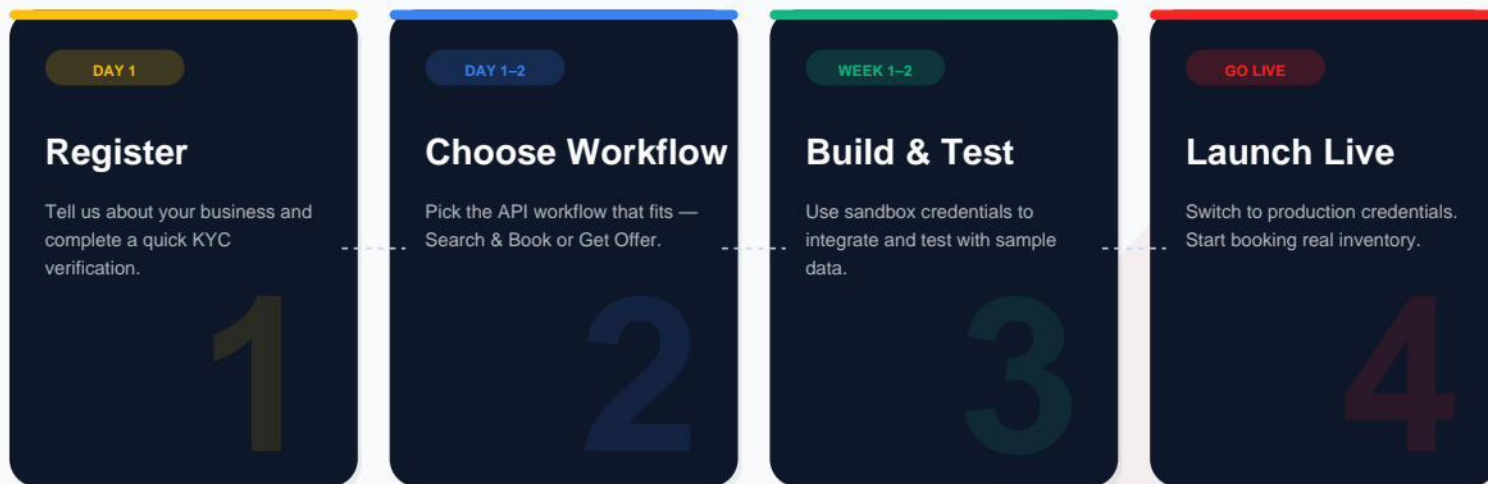

- ✓ Sandbox in days. Production in weeks.
- ✓ One contract — every supplier included
- ✓ Single normalized JSON. Period.
- ✓ Built-in dedup. Best price ranked first.
- ✓ Zero maintenance. We handle GDS updates.

500+ AIRLINES · 2M+ HOTELS · 3 GDS NETWORKS · IATA NDC · ONE API

● 4-STEP FAST TRACK

4 Steps to Go Live

A clear, predictable path from sign-up to your first booking.

Average time to first booking: 7–14 days from kick-off call.

Most teams launch within 2 weeks.

STEP ONE

Quick Registration

15-minute setup. Sandbox credentials issued instantly.

KYC protects you as much as it protects Tripagic. Verifying your identity secures your account, prevents misuse, and unlocks higher transaction limits and faster service access.

What you'll need

- ✓ Company registration or business identification
- ✓ Authorized signatory contact details
- ✓ Brief overview of your business model & traffic
- ✓ Expected booking volume (helps us provision correctly)

BOOK YOUR KICK-OFF →

- 15-min setup
- KYC verified
- Instant sandbox

STEP TWO

tripagic

Pick Your Workflow

Two workflows. Both production-ready. Choose what fits your stack.

STANDARD

Search & Book Flow

Standard workflow from search to ticketing — works for most platforms.

Search

Verify

Bag/Seat

Order

Pay

Booking

ADVANCED

Get Offer Flow

For platforms with fare cache or multi-supplier comparison.

Get Offer

Bag/Seat

Order

Pay

Booking

i L2B ratio stipulated in your agreement must be met.

NOT SURE WHICH FITS?

Our integration team reviews your platform on the kick-off call and recommends the right workflow — no guesswork required.

STEP THREE

Build in Sandbox

Test like production. Without the consequences.

Our sandbox mirrors production behavior with realistic test data. Build, break, iterate — until your integration is rock solid.

What's included

- ✓ Full flight search across all GDS + LCC + NDC sources
- ✓ Hotel availability with realistic mock rates
- ✓ Complete booking & cancellation simulation
- ✓ Identical JSON schema as production (no surprises)
- ✓ Webhooks for testing booking notifications
- ✓ Unlimited test calls — no rate caps in sandbox

BUILD WITH CONFIDENCE

What you build in sandbox runs identically in production.
Same API. Same schema. Same response shape.
No "production-only surprises" — ever.

STEP FOUR

Enterprise Security

Built for compliance. Trusted by enterprise.

Every transaction encrypted. Every access logged. Every credential rotatable. Security isn't a feature — it's foundational.

GDPR

CCPA

TLS 1.2+

SOC 2

Security features

- ✓ TLS/SSL encryption on every API call
- ✓ Time-bound, rotatable API keys
- ✓ IP whitelisting for production endpoints
- ✓ Sensitive data encrypted at rest
- ✓ Comprehensive audit logging
- ✓ Sandbox completely isolated from production

ENTERPRISE READY

Our security stack passes the procurement reviews of global OTAs, TMCs, and Fortune 500 corporate travel teams. Documentation and DPA available on request.

WHAT YOU UNLOCK

Every supplier. One API.

No restrictions. No fare markups. No hidden tiers.

FLIGHTS

GDS + LCC + NDC

- 51,519 routes
- 137 carriers
- 152 countries
- 67 LCCs

HOTELS

2M+ properties

- 190+ countries
- 50+ suppliers
- All categories
- Real-time rates

CARS

Top providers

- Real-time fleet
- Dynamic rates
- Global coverage
- All vehicle types

TOURS

Worldwide

- Local experiences
- Theme parks
- Attractions
- Tickets & more

PACKAGES

Smart bundles

- Flight + Hotel
- Flight + Car
- Dynamic pricing
- Higher conversion

INCLUDED: Amadeus (1E)

Sabre (1S)

Travelport (1G/1V)

IATA NDC (Direct)

No upcharges. No content restrictions. Same fares the airlines publish.

Real humans. Real fast.

A dedicated integration team — not a ticket queue.

Email Support

Your primary support channel

- support@tripgic.com for all inquiries
- Include API key prefix & error codes
- Documented & traceable communication
- < 24h response on business days
- Escalation path for production issues

Shared Chat

Real-time team coordination

- Dedicated Slack or Teams channel
- Direct line to your integration leads
- Quick day-to-day questions & syncs
- Email tickets remain the source of truth
- Onboarding-period priority access

Operations

Day-to-day partnership

- Performance monitoring & alerts
- Quarterly business reviews
- Roadmap visibility & feedback loops
- Product launch early-access
- Service-quality SLAs in agreement

Tip: Combining email tickets with real-time chat reduces back-and-forth and keeps your team unblocked.

Most production issues resolved within the same business day.

Funding made simple.

Prepaid deposit account. Auto top-ups. Zero surprises.

PRIMARY

Prepaid Deposit

Wire-transfer funded · Multi-currency

- ✓ Bank wire transfer to your dedicated Tripgic account
- ✓ Funds available for booking immediately on receipt
- ✓ Multi-currency deposits supported globally
- ✓ Detailed statements & invoice automation
- ✓ Transparent fees disclosed upfront

RECOMMENDED

Auto Top-Up

Set it once. Never run out.

- ✓ Bank details on file — no manual receipts needed
- ✓ Threshold-based automatic re-funding
- ✓ Smart triggers based on daily volume
- ✓ Eliminates last-minute funding scrambles
- ✓ Saves operations time every week

CONTROL

Balance Alerts

Stay ahead of every threshold.

- ✓ Custom thresholds per booking volume
- ✓ Proactive notifications before low balance
- ✓ Email & webhook delivery options
- ✓ Daily digest of account activity
- ✓ Zero sales disruption from balance issues

TRANSPARENT PRICING. NO MARK-UPS. NO HIDDEN FEES.

You see the same fares the airlines publish — we don't mark them up.

Welcome to unrestricted access.

Your Day-1 Production Checklist

A 30-minute walkthrough — and you're booking.

- ✓ Generate production API keys from your dashboard
- ✓ Configure IP whitelisting for your application servers
- ✓ Set up webhooks for booking event notifications
- ✓ Transfer initial deposit to fund your account
- ✓ Run a test search against production endpoints
- ✓ Verify booking confirmation flow with one live test

FULL ACCESS UNLOCKED

Everything Tripgic offers

No content restrictions. No fare mark-ups. No tier-based gating.

- ✓ All 3 GDS networks (Amadeus, Sabre, Travelport)
- ✓ NDC airline-direct content & branded fares
- ✓ 67 low-cost carriers across all regions
- ✓ 2M+ hotel properties globally
- ✓ Car rental & activities inventory
- ✓ Ancillaries (baggage, seats, meals, lounges)
- ✓ Post-ticketing APIs (changes, cancellations)
- ✓ Route-list API for network coverage
- ✓ Webhooks for real-time event notifications
- ✓ Dynamic packaging (flight + hotel bundles)

Most teams are processing live bookings within 2 weeks of kick-off.

Some have launched in as little as 5 business days.
